Professional Summary

Odoo Developer and IT professional with 20+ years of enterprise IT experience in system administration, IT support, POS and ERP operations, and hands-on Odoo ERP development and implementation. Builds custom Odoo modules using Python, XML and PostgreSQL, including data validation, business logic automation, automated sequences, smart buttons and QWeb PDF reports. Administered ERP, CRM and POS operations across 90+ retail and restaurant branches in Saudi Arabia. Odoo 19 Functional Certified (Odoo S.A.), PMP and ITIL 4 certified, currently completing a structured Odoo Development course at Betrac Academy (Sep 2026 – Dec 2026).

Core Skills

- **Odoo Development:** Custom module development, Odoo ORM, @api.depends, @api.constrains, @api.onchange, Many2one, One2many, Many2many fields, smart buttons, ir.sequence, QWeb PDF reports, security groups and access rights, OWL (Odoo Web Library) components
- **Odoo Functional:** Inventory, Sales, CRM, Purchase (Procurement), Invoicing, Point of Sale (POS), pricelists, WhatsApp CRM integration, workflow states
- **Programming and Database:** Python 3, JavaScript (Odoo OWL), PostgreSQL, XML views (list, form, calendar, search), regular expressions, data validation
- **IT Infrastructure:** Active Directory, Microsoft 365 administration, Google Workspace, endpoint security, networking, SOTI MobiControl (MDM), ZKTeco biometric attendance
- **POS Systems:** Odoo POS, Foodics, Oracle Micros, NCR Aloha
- **IT Service Management:** ITIL 4 incident, problem and change management, service desk setup, SLA and vendor management, multi-branch IT operations

- **Project Management:** PMP, requirement gathering, implementation planning, user training, stakeholder communication

Odoo Developer Journey

- **2007 – 2025 | Foundation in ERP and POS operations:** Supported ERP, POS and inventory systems for 90+ retail and restaurant branches in Saudi Arabia, giving a strong understanding of the business processes Odoo automates.
- **September 2025 | Moved into Odoo implementation:** Started freelance Odoo ERP and POS consulting for restaurant and retail businesses, setting up Inventory, Purchase, Sales, CRM and pricing.
- **2026 | Odoo 19 Functional Certification:** Certified by Odoo S.A. in Odoo 19 functional configuration.
- **2026 | Odoo 19 Enterprise client implementation:** On-premise project covering WhatsApp–Odoo integration, CRM lead follow-up workflow, end-to-end CRM-to-Sales process, quotation templates, and product and pricing setup.
- **September 2026 – December 2026 | Odoo Development Training:** 4-month Odoo Development Training Program at Betrac Academy, Kannur, Kerala, India.
- **2026 – Present | Custom module development:** Building custom Odoo 19 and Odoo 20 modules in Python, XML, PostgreSQL and OWL, including Hospital Management with Pharmacy and Lab, Application Form, School Management and a Pizza Restaurant suite (see Odoo Projects).

Professional Experience

IT and ERP Consultant (Freelance) – Odoo and POS Implementation

POSXPERT, Riyadh, Saudi Arabia | September 2025 – Present

- Lead end-to-end Odoo ERP customization and functional setup for restaurant and retail businesses, covering Inventory, Purchase, Sales, CRM and pricing rules.
- Develop custom Odoo modules in Python with XML views for retail operations and CRM lead capture.
- Manage Odoo WhatsApp CRM integration, sales automation pipelines, and client Google Workspace and Microsoft 365 environments.
- Standardize ITIL-aligned service desk workflows and ticketing to reduce incident resolution time.

IT Support Manager – Restaurant IT Operations

Greens Leaves Food Co., Riyadh, Saudi Arabia | May 2024 – July 2025

- Managed IT operations for a 10-branch restaurant chain, administering Foodics, Micros POS and Odoo ERP across all branches.
- Implemented a centralized OpenTicket service desk, standardizing incident and change management under ITIL.
- Supervised branch network connectivity, POS hardware and peripherals, and secure user access.

IT Application Support Specialist

Aknah Infotech, Riyadh, Saudi Arabia | January 2023 – April 2024

- Provided Level 2 and Level 3 ERP and POS application support for restaurant and retail clients.
- Maintained ERP and van sales software integrations, automating data synchronization and improving reporting accuracy.
- Configured user access rights, tax settings, pricing setups and management KPI dashboards.

IT Systems Administrator and Support Specialist

Pure Beverages Industry Company, Riyadh, Saudi Arabia | October 2021 – November 2022

- Administered Microsoft 365 and on-premises Active Directory, managing user accounts and role-based permissions.
- Configured RoutePro sales automation and SOTI MobiControl MDM to keep field sales devices available.

Senior IT Support / Acting IT Infrastructure Manager

Little Caesars Pizza (Bazbaza International), Riyadh, Saudi Arabia | August 2007 – February 2021

- Responsible for IT infrastructure across 90+ retail branches, including NCR Aloha POS, ZKTeco biometric attendance, ISP connectivity and EDSS reporting.
- Served as Acting IT Manager for 12 months, directing 24/7 technical support, IT budgeting, vendor relations and menu database updates nationwide.

Computer Operator

Parimala Mar Gregorios Memorial Charitable Trust, Cochin, India | December 2004 – June 2007

- Managed institutional records, database operations and desktop applications.

Odoo Projects

Hospital Management System – Custom Odoo Module

- Developed a hospital management module from scratch with related models for Doctors, Patients and Consultations.
- Built automatic patient ID numbering with ir.sequence (for example PID/2026/00001).
- Added smart buttons showing appointment history, a consultation workflow (Draft, Confirmed, Completed) and QWeb PDF patient reports.
- Extending the system with a Pharmacy and Lab module: medicines and tests prescribed by doctors flow to the pharmacy and lab, with both linked to Odoo Sales for billing (Odoo 20).

CRM Lead Capture and Validation Module – Custom Odoo Module

- Built an application intake module integrated with Odoo CRM pipelines.
- Implemented server-side validation with @api.constrains and Python regular expressions for PAN, Aadhaar, phone numbers and duplicate emails.
- Configured state-based form rules that lock fields once a record moves to review and approval.

Pizza Restaurant Suite – Customised Odoo Solution (Odoo 20, in development)

- Customised Odoo POS and Kitchen Display System (KDS) for pizza restaurant operations.
- Recipe management with Bills of Materials, automatically deducting ingredients from inventory after each sale.
- Integrated inventory management and CRM for customer tracking.

School Management – Custom Odoo Module (Odoo 19, in development)

- Building a school management module with a student model, with teacher management being added next.

Education and Training

Odoo Development Course

Betrac Academy, Kannur, Kerala, India | September 2026 – December 2026

Bachelor's Degree in Information Technology

IEC University | 2013 – 2015

Diploma in Computer Hardware Engineering (Hardware and Networking)

Luna Institute (KELTRON) | 2000 – 2003
