Profile Summary

Results-driven IT Operations Manager and Restaurant Technology Specialist with over 15 years of experience leading enterprise IT support, POS ecosystems, ERP platforms, and secure multi-branch infrastructure environments. Proven expertise in managing Foodics, Micros, NCR Aloha, and Odoo ERP systems while optimizing inventory, recipe management, and sales automation processes. PMP® and ITIL® V4 certified professional with strong capabilities in IT service delivery, project governance, and operational transformation. Demonstrated success in reducing downtime, strengthening network security, and implementing structured ticketing frameworks aligned with ITIL best practices. Adept at bridging restaurant operations with scalable technology solutions that enhance performance, compliance, and business continuity across distributed locations.

Leadership Impact Highlights:

- Successfully led end-to-end IT operations for multi-branch restaurant environments, ensuring high POS availability and near-zero operational disruption.
- Designed and implemented a centralized IT ticketing system that improved incident tracking visibility and significantly reduced average resolution time.
- Spearheaded ERP and POS integrations that streamlined inventory control, recipe costing accuracy, and sales reporting efficiency.
- Strengthened network security posture by configuring enterprise-grade firewalls and enforcing structured access control policies across locations.
- Optimized sales automation and handheld terminal management systems, enhancing route efficiency and field sales productivity.

Professional Work Experience

Freelance IT Consultant – POS & ERP Specialist

POS Expert Tech (Self-Employed) | Riyadh, Saudi Arabia | **Sep 2025 – Present | Hybrid**

Empowering retail and restaurant businesses through scalable POS, ERP, and technology solutions.

- Provide freelance IT consulting services** specializing in POS systems, ERP solutions, and digital transformation for small and medium-sized retail and restaurant businesses.
- Lead end-to-end POS installation, configuration, system migration, troubleshooting,** and user training to ensure smooth operational deployment.
- Implement and customize Odoo ERP modules,** optimizing inventory management, sales workflows, and financial reporting processes.
- Deliver technical advisory services for restaurant and retail technology infrastructure,** improving operational efficiency and system reliability.
- Perform system diagnostics, upgrades, and performance optimization** to enhance business continuity and reduce downtime.
- Support clients with IT infrastructure planning,** network setup, and secure access management.

IT Support Manager (Restaurant IT Operations)

Greens Leaves Food Co | Riyadh, Saudi Arabia | **May 2024 – Jul 2025**

Driving seamless multi-branch restaurant IT operations through POS, ERP, security, and ITIL-based service excellence.

- Lead end-to-end IT operations** across multiple restaurant branches, managing **Foodics POS, Micros POS, and Odoo ERP** to ensure seamless daily business continuity.
- Oversee POS configuration, system upgrades, and ERP integrations,** maintaining high availability and performance across front-end and back-office platforms.
- Administer inventory control and recipe costing modules,** improving data accuracy and enabling real-time visibility into food cost management.
- Implement ITIL-aligned service management workflows, standardizing incident, problem, and change management** processes across all locations.
- Design and deploy a customized **OpenTicket-based IT service desk system,** enhancing ticket tracking transparency and reducing issue resolution turnaround time.
- Manage Google Workspace administration,** including user lifecycle management, access control policies, and security compliance.
- Ensure consistent uptime of mission-critical systems** by proactively monitoring network infrastructure, POS environments, and ERP applications.
- Maintain and support ZKTeco biometric attendance systems** across branches, ensuring reliable workforce tracking and system integration.
- Coordinate with vendors and internal stakeholders** to execute system enhancements, security updates, and infrastructure improvements without operational disruption.

IT Application Maintenance & POS Specialist
Aknah Infotech | Riyadh, Saudi Arabia | Jan 2023 – Apr 2024

Optimized restaurant POS and ERP systems to enhance operational efficiency and minimize downtime.

- **Managed end-to-end POS application maintenance for restaurant clients**, ensuring stable system performance and uninterrupted daily operations.
- **Configured, deployed, and supported ERP and Van Sales systems**, streamlining sales workflows and improving overall operational efficiency.
- **Delivered advanced L2/L3 technical support** by diagnosing and resolving complex application, database, and integration issues, minimizing downtime.
- **Administered POS configurations including user roles, pricing structures, tax settings**, and reporting modules to maintain transactional accuracy and compliance.
- **Integrated POS platforms with back-office systems**, enhancing data synchronization, inventory tracking, and financial reporting processes.
- **Collaborated with restaurant management teams and third-party vendors to implement system upgrades**, patches, and performance enhancements aligned with business needs.

IT Systems Administration & Support Specialist
Pure Beverages Industrial Co | Riyadh, Saudi Arabia | Oct 2021 – Nov 2022

Enhanced enterprise sales operations through secure systems administration, mobility management, and optimized route automation.

- **Administered and maintained Microsoft Office 365 and Active Directory environments**, ensuring secure user access, policy enforcement, and seamless collaboration across departments.
- **Managed RoutePro Sales Automation platform**, overseeing route creation, territory mapping, and optimization to enhance field sales efficiency.
- **Configured, deployed, and supported handheld terminals (HHT)** using SOTI MobiControl, ensuring reliable mobile device performance for distribution teams.
- **Provided end-to-end infrastructure and network support** for sales and logistics operations, maintaining system stability and connectivity.
- **Implemented user access controls and security best practices** to safeguard enterprise data and ensure compliance with internal IT policies.
- **Troubleshoot hardware, software, and network-related issues**, minimizing operational disruptions and improving service responsiveness.

Senior IT Support / IT Infrastructure Lead
Bazbaza International Trading Co | Riyadh, Saudi Arabia | Aug 2007 – Feb 2021

Strengthened multi-branch IT infrastructure and POS ecosystems through secure network management and operational excellence.

- **Managed enterprise-wide IT infrastructure** including servers, LAN/WAN networks, and multi-branch connectivity, ensuring stable and secure business operations.
- **Administered and maintained NCR Aloha POS systems** across restaurant locations, overseeing configuration, upgrades, and system performance optimization.
- **Configured and managed Palo Alto firewalls**, strengthening network security posture and enforcing structured access control policies.
- **Led advanced POS troubleshooting, database administration**, and system performance tuning to minimize downtime and improve transaction reliability.
- **Oversaw IP telephony systems, ensuring seamless internal and external communication** across departments and branches.
- **Managed IT hardware lifecycle processes including procurement, deployment, maintenance**, and asset tracking to maintain operational efficiency.

Key Projects

Ticketing System Implementation

- Designed and deployed a customized IT ticketing solution using OpenTicket.
- Standardized incident management and service tracking processes.

Odoo ERP Deployment

- Installed and configured Odoo Community modules for training and business simulation environments.
- Integrated inventory and sales modules for workflow automation.

Operational Excellence & Business Impact

- Enhanced multi-branch restaurant operational efficiency by implementing POS automation and ERP-driven workflow improvements.
- Strengthened IT governance by aligning service delivery processes with ITIL best practices, improving incident control and service consistency.
- Improved management decision-making by optimizing sales, inventory, and reporting dashboards for real-time business visibility.
- Reduced operational disruptions through proactive system monitoring and structured IT service management frameworks.
- Streamlined cross-functional coordination between IT and restaurant operations, improving service reliability and performance outcomes.
